INTERNSHIP EXPERIENCE

MERN Stack Development Intern

Infoseek Pvt. Ltd. | 29 June – 15 August

- Gained practical exposure to full-stack web development using the MERN technology stack.
- Worked with front-end and back-end development concepts and understood the workflow of building web applications.
- Strengthened understanding of JavaScript-based development and modern web application architecture.
- Applied programming and problem-solving skills to practical development tasks during the internship.
- Gained experience working in a professional learning and development environment.

PROJECTS

Campus Lost and Found Items

Academic / Personal Project — Ongoing

- Developing a web-based platform designed to help students report, search, and recover lost or found items within a campus environment.
- The platform aims to provide a centralized system where users can post details of lost or found belongings and connect with the respective owner or finder.
- Designed to make the process of reporting and locating misplaced items more organized, accessible, and efficient.
- Currently working on the project's development and improving its functionality and user experience.
